

Chiari malformation/Syringomyelia/EDS

Patient Information Seminar

Professors Stoodley and Bilston are hosting a Chiari malformation/Syringomyelia/EDS medical conference from 26 – 28 June 2019 at Niagara Falls, USA, sponsored by The Column of Hope (<http://www.columnofhope.org/>). At the conference a separate session is being held for patients, carers and members of the public, where Professors Stoodley and Bilston will present summaries of the conference, including agreed areas for future research focus. There will be opportunities for those attending to ask questions and indicate problems that they believe should be subject to further research.

For those who are unable to attend the Niagara Falls conference a similar information session is being held in Sydney for Australian patients, their families and members of the public.

HOSTED BY

Professor Marcus Stoodley PhD, FRACS
MQ Health, Macquarie University,
Australia
